

VIBE PAD

The Vibe Pad is a vibrating love pad that is perfectly adapted to the female anatomy and also extremely easy to use. It offers incredible double stimulation for breathtaking orgasms. SHE places the Vibe Pad on a flat surface and sits down on it so the big wave can stimulate the vagina and the small wave can stimulate the anus. HE can use it to stimulate his balls and perineum for example. Both waves can be controlled separately with the included remote control thanks to the 2 motors. The Vibe Pad is waterproof and whisper-quiet which means that it can be enjoyed extensively at any given place.
